

Industries We Serve

- CyberSecure Essential - For small educational institutions
- CyberSecure Advanced - For medium-sized educational institutions
- CyberSecure Enterprise - For large educational institutions with complex security needs

Given your existing security capabilities, here are government facilities that would be suitable targets for your services:

- **Municipal Government Offices** - City halls, administrative buildings, and local government departments
- **Public Safety Facilities** - Police stations, emergency response centers, and 911 dispatch centers
- **Healthcare Facilities** - Government-run hospitals, clinics, and public health departments
- **Transportation Authorities** - Transit agencies, traffic management centers, and transportation departments
- **Utilities** - Water treatment facilities, power distribution centers, and other critical infrastructure
- **Courts and Judicial Buildings** - Courthouses, administrative law centers, and related facilities
- **Public Records Offices** - Facilities that maintain vital records, land records, and other government documents

Your existing security packages could be adapted for these government facilities with appropriate compliance frameworks and security measures specific to government requirements.

Based on the information I found, here's an itemized list of materials with pricing for each CyberSecure AI security package:

Package 1: CyberSecure Essential (\$25,000 - \$40,000)

Hardware Components (LanShack):

- Cat6A Structured Cabling System - Approximately \$5,000-8,000
- Basic Network Cabinet with Lock - \$1,000-2,000
- Patch Panels and Cable Management - \$800-1,500
- Entry-level Access Control Infrastructure - \$2,000-3,000

CyberSecure AI Components:

- CyberSecure AI Core Platform - \$8,000-12,000
- Automated Incident Response (basic playbooks) - \$3,000-5,000
- Threat Detection System - \$3,000-5,000
- Compliance Automation - \$2,200-3,500

Package 2: CyberSecure Advanced (\$50,000 - \$80,000)

Hardware Components (LanShack):

- Cat6A Shielded Cabling System - \$12,000-18,000
- Fiber Optic Backbone - \$8,000-12,000
- Advanced Network Cabinets with Electronic Locks - \$3,000-5,000
- Security Camera Infrastructure - \$5,000-8,000
- Intermediate Access Control System Infrastructure - \$4,000-7,000
- Environmental Monitoring for Server Rooms - \$3,000-5,000

CyberSecure AI Components:

- CyberSecure AI Core Platform - \$8,000-12,000
- Advanced Automated Incident Response - \$4,000-6,000
- Threat Detection System with AI Analysis - \$5,000-8,000

- Predictive Risk Analysis - \$4,000-6,000
- Comprehensive Compliance Automation - \$4,000-6,000
- 24/7 Monitoring and Vulnerability Management - \$5,000-7,000

Package 3: CyberSecure Enterprise (\$100,000 - \$250,000)

Hardware Components (LanShack):

- Campus-wide Cat6A Shielded Cabling System - \$25,000-40,000
- Redundant Fiber Optic Backbone - \$15,000-25,000
- High-Security Network Cabinets with Biometric Access - \$8,000-15,000
- Comprehensive Security Camera Infrastructure - \$12,000-20,000
- Advanced Access Control System Infrastructure - \$10,000-18,000
- Complete Environmental Monitoring Solution - \$8,000-15,000
- Tamper-Evident Cabling Solutions - \$5,000-10,000
- Network Segmentation Infrastructure - \$7,000-12,000

CyberSecure AI Components:

- CyberSecure AI Core Platform (unlimited users) - \$15,000-25,000
- Enterprise Automated Incident Response - \$10,000-18,000
- Advanced Threat Detection with ML - \$12,000-20,000
- Predictive Risk Analysis with customized models - \$10,000-18,000
- Comprehensive Compliance Automation - \$8,000-15,000
- 24/7 Monitoring and Vulnerability Management - \$10,000-18,000
- Security Awareness Training - \$5,000-10,000
- Custom Integration Framework - \$8,000-16,000

Additional Hardware Security Add-ons:

- Secure Server Room Kit - \$15,000-30,000

- Multi-Factor Authentication Hardware - \$5,000-15,000
- Network Segmentation Bundle - \$10,000-25,000
- Disaster Recovery Infrastructure - \$20,000-40,000
