

# Courses

DIR Texas Cyberstar Approved

## Federal Government & Real-World Scenarios

1. "Federal AI Security Fundamentals" [Curriculum includes government-specific threats, FISMA compliance, and federal security frameworks]  
[SEO Tags: federal security training, government AI protection, FISMA compliance, federal frameworks]
2. "Securing Classified AI Systems" [Curriculum includes compartmentalized security, clearance-level access controls, and sensitive data handling]  
[SEO Tags: classified AI security, government clearance, sensitive data protection, secure access]
3. "Cross-Agency Threat Response" [Curriculum includes collaborative incident management, unified security operations, and inter-agency coordination]  
[SEO Tags: agency collaboration, government incident response, cross-agency security, federal threat management]

## Higher Education & Pilot Programs

1. "University Research Security" [Curriculum includes academic-specific threats, research data protection, and scholarly integrity safeguards]  
[SEO Tags: research security, academic protection, university cybersecurity, scholarly data]
2. "Campus AI Security Implementation" [Curriculum includes multi-department deployment, student privacy considerations, and campus-wide coordination]  
[SEO Tags: campus security, university implementation, education protection, academic deployment]
3. "Higher Education Security Pilot Design" [Curriculum includes experimental security frameworks, metrics collection, and academic pilot assessment]  
[SEO Tags: education pilots, academic security testing, university trials, campus experiments]

## K-12 Education & Cybersecurity

1. "K-12 AI Security Essentials" [Curriculum includes age-appropriate protections, educational technology security, and student safety frameworks]  
[SEO Tags: school security, K-12 protection, student safety, educational technology]
2. "District Security Operations" [Curriculum includes centralized management, multi-school coordination, and resource optimization]  
[SEO Tags: school district security, K-12 operations, educational administration, multi-campus protection]
3. "Protecting Student AI Interactions" [Curriculum includes classroom AI tools, student data safeguards, and appropriate security levels]  
[SEO Tags: student interaction security, classroom AI, educational data protection, K-12 safety]
4. "Certified AI Security Professional" [Curriculum includes foundational concepts, threat modeling, secure coding practices, and hands-on labs]  
[SEO Tags: security certification, professional training, AI security skills, certified professionals]
5. "AI Incident Response and Forensics" [Curriculum includes detection techniques, containment strategies, and post-incident analysis]  
[SEO Tags: incident response, security forensics, breach containment, post-attack analysis]
6. "Secure AI Architecture and Design" [Curriculum includes design principles, security patterns, and architecture evaluation]  
[SEO Tags: security architecture, design principles, secure structures, architecture patterns]
7. "AI Security for DevOps Teams" [Curriculum includes CI/CD security integration, automated testing, and deployment safeguards]  
[SEO Tags: DevOps security, CI/CD protection, secure deployment, DevSecOps]
8. "Advanced AI Threat Hunting" [Curriculum includes anomaly detection, behavioral analysis, and proactive threat identification]

[SEO Tags: threat hunting, proactive security, anomaly detection, advanced security techniques]

9. "AI Security for the Reluctant: Essential Protections for Teams That Can't Afford to Wait" [Curriculum includes minimum viable security, quick implementations, and maximum impact strategies]  
[SEO Tags: essential security, quick implementation, security fundamentals, immediate protection]
10. "Securing Legacy AI Systems: Retrofitting Security into Existing Deployments" [Curriculum includes assessment techniques, prioritization frameworks, and incremental security improvements]  
[SEO Tags: legacy system security, security retrofitting, existing deployment protection, incremental security]
11. "AI Security ROI: Measuring and Demonstrating Security Value to Leadership" [Curriculum includes financial models, risk quantification, and executive communication]  
[SEO Tags: security ROI, value demonstration, executive justification, security investment]
12. "Rapid Response to AI Security Incidents: When Minutes Matter" [Curriculum includes early detection, containment strategies, and business continuity]  
[SEO Tags: rapid response, security incidents, timely containment, emergency security]
13. "Building a Culture of AI Security: Beyond Tools and Technologies" [Curriculum includes organizational change, security awareness, and behavior modification]  
[SEO Tags: security culture, organizational change, awareness building, security mindset]
